Either run the .exe from a command prompt using the /a switch, Or open it using something like 7-Zip

24th May 2011, 04:57 PM #6 24th May 2011, 04:58 PM #7 Found this although the above seems to be the exe still Unattended : .NET Framework 3.5 SP1 Redistributable quote from the above link states to extract it use : DotNet.exe /x Obviously substitute DotNet.exe with the actual full executable name Edit - the exe arthur posted is the correct exe (ignore my compact .net framework) Last edited 24th May 2011 at 05:04 PM. 24th May 2011, 05:21 PM #8 This is the script I wrote to install Microsoft .NET Framework 1.1, 2.0, 3.0, 3.5 + 4.0. You can just copy the bits you need. In future I'd recommend you install it manually before taking an image. It saves a lot of time!
